

National Governments Requiring Use of ODF¹

Government	Year	Level of Govt Subject to Policy	Policy Decision	Implementation
Belgium	2007	National	<p>Government agencies are <u>required</u> to:</p> <ul style="list-style-type: none"> - be able to access documents in ODF format by September 2007 (completed 9 months early in December 2007) - use ODF for intra- and interagency exchange of word processing documents, slideshow-style presentations, and spreadsheets by September 2008 (completed in December 2007) <p>Government agencies are <u>permitted</u> to:</p> <ul style="list-style-type: none"> - use other formats when creating and distributing documents internally 	<p><u>Enforcement</u> is “bottom up,” driven by “buy in” and “consensus,” not compulsion</p> <p><u>Ongoing control</u> by FEDICT (Federal Public Service Information and Communication Technology)</p> <p><u>Next steps</u></p> <ul style="list-style-type: none"> - evaluation of ODF for inclusion of approved formats into the Belgian Government Interoperability Framework
Brazil	2006, 2008	National	<p>Under <i>e-PING Standards of Interoperability for Electronic Government v 4.0 (16 Dec 2008)</i>, ODF was <u>upgraded</u> from “recommended” under <i>v 2.0 (17 Dec 2006)</i> to “adopted”, meaning ODF compliance is now mandatory . Government agencies are <u>required</u> to incorporate “adopted” file formats like ODF into new information systems and upgrades to existing systems.</p>	<p><u>Enforcement</u> through regulation</p> <p><u>Ongoing control</u> by Ministry of Planning, Budget, and Administration, Secretariat for Logistics and Information Technology</p> <p><u>Next steps</u></p> <ul style="list-style-type: none"> - development of agency-specific implementation plans
Croatia	2007	National	<p>Government agencies are <u>required</u> to:</p> <ul style="list-style-type: none"> - make each government form posted on a public Web site “accessible in a way that makes 	<p><u>Enforcement</u> through regulation</p> <p><u>Ongoing control</u> by Central State Administrative Office for</p>

¹ See links to original government sources beginning on page 7. This table originally appeared in the May 2008 New York State Electronic Documents Report to the Governor and Legislature -- "A Strategy for Openness: Enhancing E-Records Access in New York State" (Part II, Appendix III, pps. 76-82) – and has been adapted and updated for use by the ODF Alliance to reflect recent developments. See <http://www.oft.state.ny.us/policy/esra/erecords-study.htm>.

Government	Year	Level of Govt Subject to Policy	Policy Decision	Implementation
			<p>it legible in accessible freeware applications”</p> <ul style="list-style-type: none"> - Options for meeting this requirement: <ul style="list-style-type: none"> - ODF - PDF - HTML 	<p>e-Croatia</p> <p><u>Created</u></p> <p>-Reference document (<i>Operational Plan for the Implementation of e-Croatia</i>)</p>
Denmark	2007	National, Regional, Local	<p>Government agencies are <u>required</u> to:</p> <ul style="list-style-type: none"> - accept ODF and OOXML “data-processing documents” created by the public, businesses, and other governmental units <p>Government entities are <u>permitted</u> to:</p> <ul style="list-style-type: none"> - refrain from implementing the new OOXML and ODF standard if doing so would incur “additional costs or inconveniences” or raise “IT security concerns” 	<p><u>Enforcement</u> through regulation</p> <p><u>Ongoing control</u> by Ministry of Science Technology and Innovation</p> <p><u>Created</u></p> <ul style="list-style-type: none"> - mandatory standards for document exchange (OOXML and ODF), data exchange (OIOXML), electronic case and document management (FESD), electronic purchasing (OIOUBL), digital signatures (OCES), public Web sites and accessibility, and IT security (DS484) <p><u>Changed</u></p> <ul style="list-style-type: none"> - government procurement practices: “IT solutions purchased after 1 January 2008 must support” ODF, OOXML, or both, “and be capable of accepting data-processing documents in both formats, where necessary through the use of plug-ins (supplementary programs).” <p><u>Next Steps</u></p> <ul style="list-style-type: none"> - third-party evaluation of whether OOXML and ODF standards will remain mandatory after July 1, 2009 -development of implementation plans for other standards
France	2006	National	<p>Government agencies are <u>required</u> to:</p> <ul style="list-style-type: none"> - accept documents submitted in ODF format - use PDF/A to preserve text documents 	<p><u>Enforcement</u> through regulation</p> <p><u>Ongoing control</u> by General Directorate for the State’s</p>

Government	Year	Level of Govt Subject to Policy	Policy Decision	Implementation
			<p>Government agencies are <u>encouraged</u> to:</p> <ul style="list-style-type: none"> - install OpenOffice.org (an open-source, ODF-based productivity suite) - use ODF to create text documents, spreadsheets, and slideshow-style presentations <p>Government agencies are <u>prohibited</u> from:</p> <ul style="list-style-type: none"> -migrating to any productivity suite formats other than ODF 	<p>Modernization</p> <p><u>Created</u></p> <ul style="list-style-type: none"> - Interoperability framework (<i>Référentiel Général d'Interopérabilité</i>)
Germany	2008	Federal government agencies	<p>Federal agencies will be able to receive, read, send and edit ODF documents beginning no later than 2010.</p> <p>Under Germany's <i>Standards and Architectures for eGovernment Applications 4.0 (SAGA 4.0)</i>, ODF <u>recommended</u> for editable text documents , a multi-stakeholder initiative that recommends and mandates standards to be used by the German federal government.</p>	TBD
Japan	2007, 2008	National	<p>Government ministries and agencies are required to:</p> <ul style="list-style-type: none"> -solicit bids from software vendors whose products support internationally-recognized open standards <p>Open formats :</p> <ul style="list-style-type: none"> -are to be preferred, and -must be used to promote exchange of 	<p><u>Enforcement</u> though Ministry of Economy, Trade and Industry (METI)</p> <p><u>Ongoing control</u></p> <p><u>Created</u></p> <ul style="list-style-type: none"> -Interoperability framework, which took effect immediately and specifically references ODF, created procurement preference for products adhering to open

<i>Government</i>	<i>Year</i>	<i>Level of Govt Subject to Policy</i>	<i>Policy Decision</i>	<i>Implementation</i>
			<p>information between ministries</p> <p>Japan's Diet passed an <u>open standards software incentive</u> as part of its omnibus Special Taxation Measures law:</p> <ul style="list-style-type: none"> -provides tax reductions for companies which buy open-standard based software -went into effect April 2008 and expires in March 2011. 	standards, and which interoperate easily with other software.
Malaysia	2008	National	<p>Roadmap announced for:</p> <ul style="list-style-type: none"> -implementing ODF in Malaysia's public sector <p>Malaysian Administrative Modernisation and Management Planning Unit (MAMPU) adopting ODF for all new documents created from April 1, 2008 onwards.</p>	TBD
Netherlands	2007	National, Regional, Local	<p>Government agencies are <u>required</u> to:</p> <ul style="list-style-type: none"> - migrate new systems to Open Standards and Open Source - "support ODF alongside existing file formats for reading, writing and exchange of documents" - create open source implementation strategies; - share with each other knowledge gained from agency pilots, migrations, and test cases; - work collaboratively with stakeholders on openness plans. <p>ODF-based procurement now mandatory. For government bodies in the public and semi-</p>	<p><u>Enforcement</u> through "soft approach" with "high trust" but with "monitoring and ranking" of efforts and award of an annual prize for the "Most Open Public Organization"</p> <p><u>Ongoing control by</u> Ministries of Economic Affairs and Internal Affairs</p> <p><u>Created:</u></p> <ul style="list-style-type: none"> - broad definitions of the terms "open standards" and "open specifications" - list of open standards - interoperability framework; - advisory process allowing proposed technology purchases to be submitted to advisory board for assistance

Government	Year	Level of Govt Subject to Policy	Policy Decision	Implementation
			<p>public sectors:</p> <ul style="list-style-type: none"> -instructions published 24 Nov 2008 making open-standards based procurement the default for public purchases of IT worth more than 50,000 euro -use of open standards such as ODF - official listed as one of the approved open standards - is now <u>mandatory</u> ("comply or explain" why not). 	<p><u>Changed</u> government procurement practices:</p> <ul style="list-style-type: none"> - "Comply or explain, and commit" principle: For new systems, modifications, or contract extensions: <ul style="list-style-type: none"> (a) government purchases must "comply" with open standards, or government purchaser must "explain" why not; (b) purchases must be timed, and good business cases developed, to avoid unnecessary migration costs; and (c) once an open standards compliant purchase has been made, government agencies must commit on an ongoing basis to giving "preference to the application of open standards so that an exception criterion is no longer applicable."
Norway	2007	National, Regional, Local	<p>Government agencies are <u>required</u> to:</p> <ul style="list-style-type: none"> - make government documents posted on the Web accessible to the public in three (3) mandatory formats: <ul style="list-style-type: none"> - HTML (presentation) - PDF (presentation) - ODF (editable) - develop ability to RECEIVE documents from the public in these formats. <p>Government agencies are <u>permitted</u> to:</p> <ul style="list-style-type: none"> - use other formats, but only if they also produce the documents in PDF or ODF format. 	<p><u>Enforcement</u> through regulation</p> <p><u>Ongoing control</u> by Ministry of Government Administration and Reform</p> <p><u>Created:</u></p> <ul style="list-style-type: none"> - Reference document (<i>Reference Catalogue of IT Standards in the Public Sector</i>) <p><u>Next Steps:</u></p> <ul style="list-style-type: none"> - evaluating additional formats for document exchange with public sector and exchange of documents within the public sector
Poland	2007	National	<p>Government agencies:</p> <ul style="list-style-type: none"> -recommended to use of open, publicly available IT standards 	<p><u>Created:</u></p> <p>Council of Ministers National Computerization Program (NCP)</p>

Government	Year	Level of Govt Subject to Policy	Policy Decision	Implementation
			-called on to deploy technological neutrality in all government-led IT projects	<u>Next Steps:</u> Implementation from 2007-2010
Russia	2007	National	Government-wide action plan envisions: -legislative requirements to mandate the procurement of software based on how well it adheres to widely-used standards. -support of ODF in e-gov framework	<u>Created:</u> Ministry of IT and Communications Action Plan on Open Source Software Development and Usage in the Russian Government
South Africa	2007	National, Regional, Local	Government agencies are <u>required</u> to: - comply with MIOS standards (" <i>Minimum Interoperability Standards (MIOS) for Information Systems in Government</i> ") - migrate new systems and major upgrades to MIOS standards - make their IS systems Internet-centered, with access to public services and documents preferably via web browser - consider open source based solutions before proprietary ones - use ONLY the following formats: - for working office suite documents (word-processing, spreadsheet, presentation): ASCII, CSV, or ODF - for office suite documents provided in presentation view: XHTML or PDF - work collaboratively with stakeholders on openness plans	<u>Enforcement</u> through law, audit, and budget: - compliance with MIOS standards falls under South Africa's Public Finance Management Act (PFMA) - funding and purchasing government IS/ICT projects is dependent on compliance with MIOS and is subject to auditing by accounting officers and by the South African Auditor-general - cost of non-compliance with MIOS expressly rests with the non-complying entity, system or organization. <u>Ongoing control</u> by SITA (the South African State Information Technology Agency) <u>Created:</u> - broad definitions of the terms "open standards" and "open specifications" - MIOS standards within S. Africa's Enterprise Architecture, to be reviewed and updated annually after discussions with stakeholders - interoperability framework covering three key areas of technical policy: (1) Interconnectivity; (2) Data Interoperability; and (3) Information Access.

<i>Government</i>	<i>Year</i>	<i>Level of Govt Subject to Policy</i>	<i>Policy Decision</i>	<i>Implementation</i>
				<u>Changed</u> : - government procurement practices
Switzerland	2007	National, Regional, Local	Government agencies are <u>required</u> to: - use the following formats when exchanging documents with citizens or other agencies: - PDF/A (“urgently recommended”) - PDF/X (“recommended”) - ODF (“recommended under observation”) - OOXML (“recommended under observation”)	<u>Enforcement</u> through regulation <u>Ongoing control by</u> eCH (federal e-government standards agency) <u>Created</u> reference document (<i>SAGA.ch</i>)
Uruguay	2008	National	AGESIC (Agency for the Development of Government Electronic Management and Information and Knowledge Society), which is responsible for proposing IT standards for the federal government, has officially recommended the use of -ODF for editable documents -PDF for documents in final, published form.	TBD
Venezuela	2008	National	Speaking at the 2nd International ODF User Workshop on October 9-10, 2008 in Pretoria, South Africa, Carlos Gonzalez of the National Center of Information Technologies announced that the Venezuelan government had formally adopted ODF as a standard for the “processing, exchange and storage of documents.	TBD
