

## ODF Applications Support<sup>1</sup>

The rapid growth in software implementing support for the OpenDocument Format (ODF) provides genuine choice for consumers, especially for governments seeking to gain greater control over and direct management of their own information, and reflects growing market demand. Support for ODF includes proprietary, open source, and web-based applications, and a growing number of content management systems.

### Text documents<sup>2</sup> (.odt)

- [AbiWord 2.4](#) (reading from 2.4, import and export from 2.4.2)
- [Adobe Buzzword](#) (web-based word processor with planned support for .odt)
- [ajaxWrite](#) (web-based word processor can read/write .odt)
- [Apple TextEdit](#) (reading and writing)
- [Babys bSuite 2008](#) (odt. support via built-in converter)
- [Corel WordPerfect Office X3](#) (opens .odt, full support planned)
- [Google Docs](#) (web-based application accepts/uploads documents in .odt)
- [IBM Lotus Notes 8 Documents](#) (supports .odt)
- [IBM Lotus Symphony Documents](#) (supports .odt)
- [Ichitaro](#) (Japanese)(read/write support via plug-in, full built-in support from 2007)
- [Haansoft Hanguul](#) (Korean suite; plans read/write support for ODF in 2009)
- [KWord](#) 1.4+ (full native support since 1.5)
- [NeoOffice](#) 2.0 Writer (OpenOffice.org 2.0.3 derivate)
- [NextOffice](#) 9.0 Writer (OpenOffice.org 2.0.2 derivate)
- [OpenOffice.org Writer](#) (full native support from 2.0)
- [Primesharing's TeamDrive](#) (collaboration tool; create, open, edit, exchange .odt files)
- [RedOffice 3.0](#) (Chinese suite with support for .odt from v3.0 and higher)
- [SEPT-Solutions Mobile Office v1.2](#) (reads .odt on your mobile; support planned for editing/creating in .odt)
- [Softmaker Office 2008](#) (reads/writes .odt)
- [Sun StarOffice 8 Writer](#) (full native support for .odt)
- [Thoughtslinger](#) (text editing collaboration software supports .odt)
- [Zoho Writer](#) (an online word processor, can read/write .odt)

### Spreadsheet documents (.ods)

- [EditGrid](#) 2.0 (full support)
- [Google Docs](#) (web-based spreadsheet application that accepts .ods)
- [Gnumeric 1.7.14](#) (reads, writes .ods)

<sup>1</sup> See also <http://www.opendocumentfellowship.com/applications> and [http://en.wikipedia.org/wiki/List\\_of\\_applications\\_supporting\\_OpenDocument](http://en.wikipedia.org/wiki/List_of_applications_supporting_OpenDocument) for other lists.

<sup>2</sup> These include word processors and collaboration tools.

- [IBM Lotus Notes 8 Spreadsheets](#) (supports .ods)
- [IBM Lotus Symphony Spreadsheets](#) (supports .ods)
- [KSpread](#) (basic support in 1.4.x, native support in 1.5 onwards for .ods)
- [NeoOffice 2.0 Calc](#) (OpenOffice 2.0.3 derivate)
- [NextOffice 9.0 Calc](#) (OpenOffice 2.0.2 derivate)
- [OpenOffice.org Calc 2.3](#) (full support from 2.0, import-only in 1.1.5)
- [RedOffice 3.0](#) (Chinese suite with support for .ods from v3.0 and higher)
- [Sun StarOffice 8 Calc](#) (full native support for .ods)
- [Tables 1.4](#) (for Mac OSX; imports .ods)
- [Zoho Sheet](#) (imports, exports to .ods)

## **Presentation documents (.odp)**

- [ajaxPresents](#) (compatible with .odp)
- [IBM Lotus Notes 8 Presentations](#) (supports .odp)
- [IBM Lotus Symphony Presentations](#) (supports .odp)
- [KPresenter](#) (basic support in 1.4.x, native support in 1.5 onwards)
- [NeoOffice 2.0 Impress](#) (OpenOffice 2.0.3 derivate)
- [NextOffice 9.0 Impress](#) (OpenOffice 2.0.2 derivate)
- [OpenOffice.org Impress 2.3](#) (full native support from 2.0)
- [RedOffice 3.0](#) (Chinese suite with support for .odp from v3.0 and higher)
- [Sun StarOffice 8 Impress](#) (full native support for .odp)
- [Zoho Show](#) (imports .ods)

## **Content management systems**

- [Alfresco ECMS 2.1](#) (through ODF Virtual File System)
- [Apache Lenya](#)
- [Aykula DMS](#)
- [CPS Project](#)
- [eZ Publish](#)
- [Plone](#)
- [SiSU](#)
- [TYPO3](#)
